```
COM9 - Tera Term VT
File Edit Setup Control Window Help
TI Collector
Restarted
Channel: 1
ConfigRsp: 0x1
Temperature=25
PermitJoin=0N
Temperature=65535
Temperature=29
Temperature=29
Temperature=25

COM11 - Tera Term VT
File Edit Setup Control Window Help
Console <h for help>
> Valid Commands
-----
h: help
q: quit and shutdown UART
c: clear the screen
t: display current temperature
> Current temp = 29C (85F)
> Current temp = 29C (85F)
> Current temp = 29C (85F)
>
```

All modifications done for both Sensor and Collector were through Lab 5 instructions.
